Reverse Repurchase Agreements:

This is a contractual arrangement between two parties, where one party agrees to sell securities to another party at a specified price with a commitment to buy the securities back at a later date for another (usually higher) specified price. Our Repurchase Agreements are overnight maturity with reputable financial institutions and overcollateralized with U.S. Treasuries. In the event of a default by the counterparty, Paxos is able to liquidate the U.S. Treasury collateral to make itself whole. As all trades are overcollateralized, the risk of loss is not deemed to be material.

Notional Position Value:

This is the value at time of purchase of the particular security.

Weighted Average Maturity (WAM):

This is a Value \$ weighted average of all the maturities of the securities held including Reverse Repurchase Agreements and Cash at 1 day. WAM can be used as a measure of sensitivity to interest rate changes and market changes.
